# Ball Game
Can you finish the challenging route?

Platform: PC and Mobile

An arcade game in which you control a ball, avoid obstacles and traps.
The player needs to finish the route by avoiding obstacles and traps to go to the next level. The game contains 5 worlds, each world contains 3 levels.
The player can collect coins which he can use to customize the ball.

1. **Players:**

   Single player game.
   The game is targeted to young-middle age players.

2. **Goals:**

   The goal is to navigate the ball to the end of the route and to clear all levels of the game.
   At the end of each level the player will get a message that he finished the level and will continue to the next level.

3. **Game Loop:**

   In the beginning of the game the player will get a control guide and easy tutorial level.

   The player will control the ball with the keyboard: W,A,S,D or arrows key to move and spacebar to jump(in some levels).
   The player will need to avoid obstacles and traps to advance in the game and he could collect coins to customize the ball.
   Each level will be more challenging, more fun and new obstacles.

   The game will notify the player when he finishes a level and a button to the next level.

4. **Rules:**

   The player will learn the rules in the beginning of the game with a tutorial level.
   The rules are very simple.
   The player crosses the route avoiding obstacles and traps and without falling from the route.

5. **Resources:**

   The resources of the game are coins and a ball.
   The player could collect coins in each level.
   The player could use the coins to customize his ball.

6. **Conflicts:**

The player's main conflict is how to finish the level and avoid the obstacles and traps.
Another conflict is should the player collect the coins or finish as fast as he can.

7. **Limits:**

The player limits are the route. If the player falls off the route he will be respawned in the beginning of the level.
The player cannot walk over obstacles, he needs to go around them.

8. **Result:**
The result of the game is binary: the player succeeded or failed to finish the route to go to the next level.
